

# Stephanie Tsang

---

UX/UI Designer

## 3 Reasons

why I'd be a great fit at Mobials

📍 Toronto, ON.

# Data-driven problem solving

## What Mobials needs:

Conduct and review user research to make data-driven decisions and opportunities for product or feature designs

**I lead research and testing at  
Stitchology.**

Synthesizing the priority 3 pain points serves as a focal point for our team's problem statement and ideations.

**Iterative approach for improving  
product solutions**

My team and I collaborated to provide actionable recommendations to pivot the product's key task flows. This resulted in a 200% increase in customer conversions pre-launch!

# Cross-collaborative teamwork

## What Mobials needs:

Working in a dynamic, fast-paced environment with cross-functional teams and present designs to members, managers, and leaders

**I design in lean environments with the development team**

At Develop for Good, we ideate solutions together and then work in parallel to ensure a steady output of product

**I've built design systems for visual consistency and efficiency**

As the solo designer at ParentHero, I collaborate with the development team to add the design components and code to build the design system.

# Management experience

## What Mobials needs:

Evaluate the needs of customer base and help to define strategic design goals and requirements for best user experiences

## Identify design opportunities from user & business perspectives

In my previous role, I increased team efficiency by 50% through improving communication, re-defining processes, and identifying employee frustrations and redundancies.

## Project management prioritization

Over the past year, I've continued to work with previous clinic team to complete projects while in school and working with startup teams part time.

# Bonuses of why I'm a great candidate

---

## Work experience in healthcare

I've worked closely with high powered individuals like doctors, lawyers, and insurance adjudicators to meet patient needs and achieve goals.

## High ROI with independent work

A redesign project for a local clinic led to a 120% increase in site traffic in one month.

## Self taught for front-end fluency

By understanding the feasibility and constraints of my designs, I have faster design cycles and product deliveries working with engineers.

# Thanks for your time

---

and stay safe!
