Stephanie Tsang

UX/UI Designer

3 Reasons

why I'd be a great fit at Prodigy

- Toronto, ON.

Data-driven problem solving

What Prodigy needs:

Evolve the user experience and optimize marketing properties to help improve acquisition and activation with a research-first approach

I lead research and testing at Stitchology.

Synthesizing the priority 3 pain points serves as a focal point for our team's problem statement and ideations.

Iterative approach for improving product solutions

My team and I collaborated to implement research-based feature recommendations to pivot the product's key task flows. This resulted in a 200% increase in customer conversions pre-launch!

Cross-collaborative teamwork

What Prodigy needs:

Championing brand standards while being highly collaborative to bridge the communication between design and marketing

I design in lean environments with the development team

At Develop for Good, we ideate solutions together and then work in parallel to ensure a steady output of product

I've built design systems for visual consistency and efficiency

As the solo designer at ParentHero, I collaborate with the development team to add the design components and code to build the design system.

Management experience

What Prodigy needs:

Proactive, with a tendency to look for opportunities to improve and evolve projects without direction

Identify design opportunities from user & business perspectives

In my previous role, I increased team efficiency by 50% through improving communication, re-defining processes, and identifying employee frustrations and redundancies.

Project management prioritization

Over the past year, I've continued to work with previous clinic team to complete projects while in school and working with startup teams part time.

Bonuses of why I'm a great candidate

Work experience in healthcare

I've worked closely with high powered individuals like doctors, lawyers, and insurance adjudicators to meet patient needs and achieve goals.

High ROI with independent work

A <u>redesign project</u> for a local clinic led to a 120% increase in site traffic in one month.

Self taught for front-end fluency

By understanding the feasability and constraints of my designs, I have faster design cycles and product deliveries working with engineers.

Thanks for your time

and stay safe!
